

STANDARD MYCOTOXINS

AN OPTIMAL ELISA SYSTEM FOR MYCOTOXIN ANALYSIS

Requires only one standard to produce accurate results

One common extraction for Aflatoxin B1, Total, DON, ZON, Fumonisin

IN JUST 5 MINS

The most cost-effective
ELISA method

PRECISE AND STABLE LIKE A REGULAR ELISA SYSTEM

1-Standard ELISA series is an innovative ELISA method using a precalibrated curve for the quantification of mycotoxins.

The precalibrated standard curve of the 1-Standard method was run multiple times in ProGnosis Biotech facilities and following a thorough examination and validation it is unique for every lot. The user can download the precalibrated curve on Prognosis Data reader.
