

# STANDARD MYCOTOXINS

---

## AN OPTIMAL **ELISA SYSTEM** FOR MYCOTOXIN ANALYSIS

---

Requires only one  
standard to produce  
accurate results

---

One common extraction  
for Aflatoxin B1, Total,  
DON, ZON, Fumonisin

---

**IN JUST**  **MIN**

The most cost-effective  
**ELISA method**

# PRECISE AND STABLE LIKE A REGULAR ELISA SYSTEM

---

---

1-Standard ELISA series is an innovative ELISA method using a precalibrated curve for the quantification of mycotoxins.

---

The precalibrated standard curve of the 1-Standard method was run multiple times in ProGnosis Biotech facilities and following a thorough examination and validation it is unique for every lot. The user can download the precalibrated curve on Prognosis Data reader.
